Location: Pudukkottai, Tamil Nadu

CAREER OBJECTIVE

Highly motivated B.E. CSE (AI & ML) student with a strong technical foundation in Python, Java, and Machine Learning, seeking an entry-level role in AI/ML to leverage my skills and drive innovation. Proven leadership experience as Secretary of Team Yuvenza, with hands-on project experience in predictive modeling, automation, and data-driven solutions. I'm passionate about building efficient solutions and exploring emerging tech. Eager to contribute to impactful projects and grow with a forward-thinking team.

SKILLS

- **Languages:** Tamil and English.
- **Programming:** Proficient in **Python, Java, C,** and **C++.**
- **Domain Knowledge:** Strong understanding of **Data Structures & Algorithms (DSA), Database Management,** and **Web Development.**
- **Specialized Interests:** Deeply interested in **Biophilia** and **Cynophilist** studies, reflecting a strong connection to nature and animals.

EDUCATION

- **Chennai Institute of Technology** | B.E. in CSE (AI & ML)
 - *Current CGPA: 8.36*
- **MRM International School** | Completed 12th Standard
- **Velammal Bodhi Campus, Thanjavur** | 10th - 11th Standard
- **Mount Zion International School** | Completed Primary and Middle Standards

LANGUAGES

- English
- Tamil

CERTIFICATIONS

- [Machine Learning A-Z \(Udemy\)](#)
- [Python for Data Science and Machine Learning Bootcamp \(Udemy\)](#)
- [AWS Cloud Practitioner Essentials \(AWS\)](#)
- [Python Essentials 1 \(Cisco\)](#)
- [Python Essentials 2 \(Cisco\)](#)
- [CCNA: Introduction to Networks \(Cisco\)](#)
- [MongoDB Basics for Students \(MongoDB\)](#)

LEADERSHIP & EXPERIENCE

Secretary | Team Yuvenza (Youth Club of CIT):

- Cultivated a collaborative environment by mentoring club members, defining project milestones, and resolving logistical bottlenecks to enhance event quality and student engagement.

Machine Learning Researcher & Developer:

- Engineered the AirRisk and HealthRisk Prediction systems, utilizing supervised learning algorithms to analyze environmental and health datasets for early-stage risk assessment.
- Conducted deep-dive research into Air Quality Prediction models, identifying key environmental variables to improve the reliability of predictive air-index monitoring.

PROJECTS

- [AirRisk Prediction](#) | Python, Machine Learning
 - Developed a predictive model to forecast atmospheric risk levels and pollutant concentrations (PM2.5).
- [HealthRisk Prediction](#) | Python, Scikit-Learn
 - Built a classification-based system to evaluate patient health risks based on clinical parameters and historical health data.
- [PyMail](#) | Python, SMTP
 - Engineered a Python-based automation tool to streamline the process of sending personalized emails with attachments.
- [AgentLend AI](#) | Python, FastAPI, WDK
 - Architected a robust backend using FastAPI and SQLAlchemy to manage persistent loan states, automated background workers, and real-time dashboard updates.
